

UtopiaSoft, LLC.

Providing custom software solutions to customers since 2009.

Our Story

Founded in 2009 in Clarkston, MI, UtopiaSoft began with developing and maintaining software projects for just a few customers. Over the next couple of years, we expanded into new markets and found new customers that had a need for custom built software solutions. Our clients come from automotive, retail, non-profit, industrial, and many different industries.

What We Do

We specialize in custom built applications that are built from the ground up. We build our software to stand the test of time. We use the latest technology and coding standards to provide the best solution possible to our customers. Our solutions include, large scale e-commerce websites, inventory systems, collaboration software, such as task lists, dashboards that query data from a range of different sources, and so much more.

Our Services

- **Application Development**

We stride for perfection in our apps – from the small utility apps to large enterprise apps. From concept, to design, to development, to testing, and release, our apps will meet your business needs – fast and cost effective. We can help you with everything from web to desktop to the enterprise to mobile and more.

- **Mobile App Development**

We create mobile apps for iOS and Android platforms – from building a few screens to large enterprise integrated apps. We can help you with everything from design, development, testing, and publishing it to the app store – fast and cost effective. Don't let your company get left behind, let us create the perfect app for your business.

- **Websites**

We have been creating websites at UtopiaSoft for many years – we build sites ranging from a simple business marketing website to an e-commerce site with over 10,000 items. Let us create your brand new website or upgrade an existing one built with the latest web technology, using HTML5, CSS3, and responsive mobile pages.

- **Consulting**

With over 15 years in the information technology field, UtopiaSoft can provide expert advice for your development projects, from software design, to process improvement, to improving performance.

Let Us Design and Build Your Next App

- **Web Apps**

Whether its building an inventory system app that contains over a million items, or a task list app that will provide critical information to every team member, we build solutions that fit every customers need. We have years of experience in web app development for every platform and device.

- **Mobile Apps**

We create mobile apps for iOS and Android platforms. You can depend on us to create the perfect app for your business needs, whether it is upgrading an existing app or starting a brand new app. We will provide a solution from design, to development, to testing, to publishing it in the App Store.

- **Other Solutions**

We develop a full spectrum of software solutions, from e-commerce, to dashboards, to marketing websites, to task lists, we can improve your company efficiency and financial performance – fast and cost effectively.

Our solutions include, large scale e-commerce websites, inventory systems, collaboration software, such as task lists, dashboards that query data from a range of different sources, and so much more..

Our clients come from automotive, retail, non-profit, industrial, and many different industries.
